Maximum: 348.9 m  
Average: 17.2 m  
Minimum: 0.6 m

**A team managed to lose  
points**

Someone figured out that the flags  
(keys) were SHA-1 hashes of U2 song  
titles

# The Flags

1. `key{18e9d8d92b4c6342ffd51de9934b69223c312b51}` => Sunday Bloody Sunday
2. `key{dc76ee78430d2982026f8364dbccb5755f6d5561}` => Where The Streets Have No Name
3. `key{b220a91e7eab10fde8677c149829fee7ef6b6758}` => Bullet The Blue Sky
4. `key{ee16dd465865e2233c2e715f11ef3caf4ac79c03}` => I Still Haven't Found What I'm Looking For
5. `key{2645e286540c44f4bac5f648dfe301c81dcfbff7}` => Get On Your Boots
6. `key{8aace50bc0675c767c949fea6ae483a5212a739d}` => Angel Of Harlem
7. `key{d21f5c37658648250bfbb22824a337174ced3161}` => The Incredible Fire
8. `key{04e3895d689bbbe88f80021e3a8428eb3b626b6f}` => Sometimes You Can't Make It On Your Own

**Nick Andre did a lot of  
damage**

The username:password of the CTF VM now available for download is defcon:ming@ling (long story)

**A look back at each of the  
challenges and the big  
idea behind each flag**

---

The entire game (source code) has been released to GitHub: <https://github.com/mchow01/Security/tree/master/ctf-f2013>

There is so much more  
security #fail in this game  
beyond the challenges...
